

LIZARD PEOPLE

Detect Lizard Lies

action: **Select:**
Fact Checker.

Remove 2.

One search,
one lie
disproven.

LIZARD PEOPLE

Detect Lizard Lies

action: **Select:**
Fact Checker.

Remove 2.

One search,
one lie
disproven.

THE BIRDS

Prove Bird Reality

action: **Select:**
Moderator.

Remove 2.

Ah yes, that
meme is
definitely the
truth...

THE BIRDS

Prove Bird Reality

action: **Select:**
Moderator.

Remove 2.

Ah yes, that
meme is
definitely the
truth...

EITHER

Find the Source

action: **Move** a
Moderator 3
nodes.

Remove 1 from
each node.

So this post was
from this person's,
sister's, friend's,
cousin's, ex-
boyfriend...

EITHER

Find the Source

action: **Move** a

Fuzzy Matching

action:

Select: Node With Flag and Moderator.
Name a theory.

Remove the flag and **Remove** 2 Engaged and **Remove** 1 on each connected node.

This job is easy when everyone is copy pasting the same argument.

Fuzzy Matching

action:

Select: Node With Flag and Moderator.
Name a theory.

Remove the flag and **Remove** 2 Engaged and **Remove** 1 on each connected node.

This job is easy when everyone is copy pasting the same argument.

Keep an Eye

action:

Place a flag on two nodes that do not have a flag.

You may **move** a Moderator one.

I'm just going to keep this page on auto-refresh today.

Quick Response

reaction:

Select: Buy In.
Name a theory.

Remove 2 Engaged. Then **Remove** 1 on each connected node.

I already corrected this!

Respond to the call

action:

Move 3 **Moderators** up to 3 nodes.

Time to open up some more tabs.

Train the Platform

action:

Place this in front of you.
Add all removed conspiracy tokens here.

When 8 tokens are here: **Select:** node, **add** a new Moderator, and **Remove** 3.

The algorithm is learning. What could possibly go wrong?
